(760) 840-6075 | joshualara9087@gmail.com | linkedin.com/in/josh-laraa | U.S Citizen

EDUCATION

California State University, San Marcos **May 2026**
Bachelor of Science in Software Engineering GPA: 3.65/4.00
Relevant Coursework: Data Structures & Algorithms, Databases, Web Programming, Program Management, Requirements & Design

TECHNICAL SKILLS

Languages: Python, Java, C++, TypeScript, ADA, SQL, HTML, CSS
Frameworks & Libraries: React, Next.js, Node.js, Spring Boot, PySide6 (Qt)
Cloud, AI & Tools: AWS, Docker, Git, Vercel, Postman, Swagger, Jira, GitHub Copilot, Cursor
Product Skills: Agile Methodologies, Data Analysis (SQL, Python, Excel), Version Control, Wireframing, Technical Documentation

WORK EXPERIENCE & LEADERSHIP

Honeywell Aerospace **Phoenix, AZ**
Software Engineer I May 2026 – Present

- Contributing to **Diabolt**, a full-stack diagnostic and monitoring tool for Honeywell Thunderbolt Avionics platform, supporting GSM data collection through a server-and-connector architecture
- Coordinating **cross-functional** engineering work across software, hardware, and program teams via Jira and code reviews on an avionics diagnostic platform, accelerating delivery through AI-assisted tooling

Honeywell Aerospace **Clearwater, FL**
Software Engineer Intern June 2025 – August 2025

- Contributed to military flight ADA software for Boeing's **MQ-25** drone, improving GPS navigation accuracy
- Designed and deployed a Docker onboarding environment adopted by engineers, cutting DDCI toolchain setup down from a multi-step process to a single build

Millennium Health **San Diego, CA**
Software Engineer Intern June 2024 – August 2024

- Designed and delivered a full-stack specimen-tracking application used by **50+** technicians, replacing manual tracking steps with automated scanning workflows
- Built and validated responsive React/JavaScript frontend features (real-time status updates, interactive scanning interface) via Agile sprints, testing **API** communication with Postman and Swagger.

Society of Hispanic Professional Engineers(SHPE) **San Diego, CA**
Treasurer/Vice President January 2024 – May 2026

- Managed and forecasted a **$50K** chapter budget, coordinating funding proposals with stakeholders to send 12+ students to SHPE National two consecutive years
- Grew chapter size **6x** by organizing and hosting technical workshops with industry professionals on LeetCode/technical interviewing, version control (Git), and PCB design

Student Knowledge and Applied Learning in Engineering **San Diego, CA**
Founder August 2024 – May 2026

- Developed and initiated SKALE, a project-based infrastructure program to revitalize student engagement and innovation through multi-disciplinary engineering projects at CSUSM
- Raised over **$100k+** in organization funding and helped over **90%** of our students receive job offers in the industry.

PROJECTS

Senior Capstone — Project Xplain: LLM-Powered X-Ray Assistant **August 2025 – May 2026**
Python, PySide6 (Qt), AWS Bedrock Agent Runtime

- Built an AI-powered desktop application in Python enabling technicians to interact with X-ray equipment through natural-language conversations, replacing manual handbook searches with LLM-assisted workflows
- Designed a real-time desktop UI with PySide6 (Qt) on Windows, integrating a Python backend that interfaces with AWS Bedrock Agent Runtime to invoke an LLM trained on equipment handbooks

JL Auto Detail — Full-Stack Web Platform **March 2026 - Present**
React, TypeScript, Next.js, Tailwind CSS, shadcn/ui, Vercel, Claude, Cursor

- Designed and built a full-stack booking platform for a family-owned detailing business, driving online bookings that generate direct revenue
- Own the application end-to-end; architecture, feature development, and hosting deployment on Vercel. Iterating based on real business needs and customer feedback
